Projects

India Stock Market Analysis Dashboard | Power BI, DAX, Power Query, Excel

Dec 2025

- Developed an interactive Power BI dashboard to analyze historical stock market performance and financial trends.
- Cleaned and transformed raw datasets using Power Query and created KPIs using DAX measures.
- Designed dynamic dashboards with slicers, charts, and drill-through functionality for business insights.
- Improved decision-making by visualizing stock performance, trading volume, and market trends effectively.

VisionType = macOS OCR & Automation Tool | Python, OCR, macOS, AppleScript, PyTesseract

Jun 2026 – Sep 2026

- Developed a native macOS menu bar productivity application to extract on-screen text via OCR and inject it directly into restricted interfaces.
- Integrated macOS Quartz (CoreGraphics) event taps to simulate physical UTF-16 Unicode keystrokes, seamlessly typing emojis and code while bypassing clipboard paste detection.
- Engineered a Natural Typing Mode featuring Gaussian timing jitter (12-85ms) and cadence pauses to prevent automated bot and proctoring detection.
- Built regex-powered text cleaners (line-number stripping, emoji artifact filtering, broken line rejoining) and live buffer telemetry.

DebugFlow.ai – Autonomous Multi-Agent Code Debugger & PR Generator | Python, Tree-sitter, LLM

Sep 2026 – Present

- Architected an autonomous multi-agent code repair system utilizing LangGraph state machines, LLM reasoning, and AST analysis.
- Integrated Tree-sitter syntax parsers to trace error coordinates and isolate root causes at exact concrete syntax tree node boundaries.
- Automated reproduction and verification cycles by synthesizing targeted pytest suites executed within an isolated ephemeral sandbox with cyclical self-correction (up to 3 retries).
- Generated surgical unified diff patches and automated GitHub Pull Request creation with dynamic changelogs and 1-click downloadable .patch files.
- Link: [GitHub](#)

Training

Data Science Training | Techvanto Academy

May 2024 – May 2025

- Completed comprehensive training in Python for Data Science, covering data manipulation, visualization, and statistical analysis.
- Worked with **NumPy, Pandas, Matplotlib, and Seaborn** for data preprocessing, exploratory data analysis (EDA), and visualization.
- Learned machine learning concepts using **Scikit-learn**, including regression, classification, clustering, feature engineering, and model evaluation.
- Certificate link: [Certificate](#)

Certificates / Certifications

- | | |
|--|----------|
| • Complete Machine Learning & Data Science – GeeksforGeeks | Nov 2025 |
| • Generative AI & Computational Theory – Springboard | Aug 2025 |
| • Cloud Computing IIT Kharagpur – NPTEL | May 2025 |
| • Computer Networking & Computer Design Specializations – Coursera | Oct 2024 |

Skills

Languages C++, Python, SQL

Technologies/Frameworks: Pandas, NumPy, Power BI, Spring Boot, Docker, Jenkins, Git, PostgreSQL

Domain Skills: Data Structures & Algorithms, Data Analytics, DBMS, OOP, Problem Solving

Education

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering — CGPA: 7.83

2023 – Present

Phagwara, Punjab

Matrix Sr. Sec. School

12th — Percentage: 84.20%

2021 – 2022

Sikar, Rajasthan

Tagore Public School

10th — Percentage: 93.2%

2018 – 2019

Jhunjhunu, Rajasthan
